# Core Concepts: Rotary Endodontics

## Target Group

This course is designed for general practitioners wishing to incorporate rotary endodontics into their practices, for endodontists wishing to move from hand to rotary instrumentation and for current rotary users wishing to increase their proficiency in modern rotary techniques.

## Learning Goals:

Upon Completion participants will be able to successfully create a treatment plan and perform root canal therapy utilizing modern, basic rotary techniques. Participants will understand why each step and technique are important for achieving clinical success.

## Course Content

- Troubleshooting Diagnostics
  - Learn the three diagnostic objectives.
  - How to perform the "S.O.A.P." analysis.
  - Learn when it's best to refer.
- Endo Prep and Anesthesia Tips
  - Consistently get traditionally difficult areas profoundly numb.
  - Visibility appropriate magnification and illumination.
  - Rubber dam tips and tricks.
- Creating Endodontic Access
  - How many canals? Know the probabilities.
  - The simple trick for knowing when you have proper access.
  - Creating straight-line access.
  - Determining working length with confidence.
- Rotary Instrumentation fundamentals
  - Traditional rotary file design and techniques.
  - The advantages of a non-cutting tip.
  - Tips for avoiding file fracture.
  - What's new with irrigation and lubrication.
- Successful Obturation
  - Get a dense, three-dimensional fill in less time.
  - Creating an optimal coronal seal.

## About the Speaker

### William Henson DDS

Dr. Henson graduated from Southern Methodist University and the University of Texas Dental School at Houston. He served in the U.S. Air Force before starting his private practice in the Dallas, Texas area in 1973. Dr. Henson was a member of the Baylor University College of Dentistry faculty from 1987 to 1993, completing an Endodontic Fellowship there in 1998.
